## About Me

I am a technology leader with over 2 decades experience managing software products and systems, teams and projects. I have held technology and management roles with several MNCs and startups over this period, and have experience working on diverse business domains. I'm currently working on my software product startup Atishri Technologies.

I'm also the Author of the book Embracing Technology (BPB Publications).

## Objective

Seeking Consulting opportunities in Software Product Development where we (Atishri Technologies) can leverage our experience and skills to help customers. Open to roles in Project Management, Technology Leadership/Management and Software Design/Architecture.

## Work Experience

### Atishri Technologies | Founder, Director

2019 – Present

Handling multiple roles (Product & Technology Management, Recruitment). Working on a product for SMB and Manufacturers. Have also provided services in Travel eCommerce and Secure document management.

### Multiple Companies | Engineering Manager/Director

2010 – 2019

I held Technology leadership positions with multiple product companies in this period, where I managed teams, products and projects. I mainly worked with Yahoo!, Expedia and a few other startups.

### Multiple Companies | Individual Contributor

2000 – 2009

I held individual contributor (Software Engineer to Lead) positions with multiple product and captive services firms during this period. I worked with Yahoo!, Fidelity Investments, Microsoft and a few other companies.
